

## **Alten UK opportunities – Aerospace / Railway / Automotive / Energy / Nuclear / IT**

ALLEN was set up in 1988 by three French engineering graduates. Today, the company supports some of the world's biggest companies with their R&D and information systems projects.

As a European leader in technology consulting and engineering with around 28.000 employees in 21 countries, ALLEN has stayed true to its origins in engineering, which now, more than ever before, holds the key to the major challenges of the future.

ALLEN Ltd is currently involved in innovation development for the automotive, aerospace, railway and energy industries with premium customers in the UK. ALLEN currently offers opportunities to high potential engineers to join their teams in order to answer the continuous demand of customers and tackle exciting challenges.

As part of our development in Aerospace / Railway / Automotive / Energy / Nuclear and IT sectors, we are currently looking for engineer(s) with various skillsets and interests.

### **Graduate Scheme Positions: Deadline 28<sup>th</sup> February. Engineering / Management / Business Master Required**

- Business Manager Graduate.
- Cluster Leader & Technical Leader Graduate.

### **Engineering Consultant Positions: Engineering Master Required**

Working as part of ALLEN's aerospace team, you will have the opportunity to be involved in many challenging engineering activities for a wide variety of customers:

- System design and integration.
- Configuration management.
- Testing / Ground Test / Flight Test.
- FRACAS Engineers.
- Control Engineers / Engine Performances.
- Software Engineers {embedded and applicative}.
- Functional safety.
- Electrical engineering.
- Systems engineering.
- Business analysis.
- Manufacturing engineering.
- Logistics.
- Quality.
- Project management.

### **The ideal candidate must show:**

- High level of commitment towards ALLEN and our customers stakes.
- Solutions oriented mind-set.
- Delivery focus.
- Result driven and fact-based approach.
- Strong abilities to work under pressure.
- Autonomous technical project management abilities.
- Abilities to work and progress in a cross-functional environment.

### **Ideal Skills & Pre-requisites:**

You have to be qualified in a M.Sc. or MEng with a technical engineering background or have demonstrable experience in some of the previous activities.

At ALLEN Ltd you will join one of the fastest growing consultancies in the UK, with variety of customers and activities. Personal qualities that we value are the ability to act professionally as a consultant and to understand the client's goals and values. These include someone who is positive, able to create and maintain long lasting relationships with our customers, thrilled by challenges and able to use creativity and hard work to find new solutions.
